

# LAURA ORTUÑO LÓPEZ

## SENIOR PHP / SYMFONY ENGINEER & TECH LEAD

Madrid, España • 617936462 • laura.ortunolopez@outlook.es • linkedin.com/in/lauraortunolopez • github.com/lortuno

Senior PHP / Symfony Engineer and Tech Lead with 10+ years of professional software development experience, including extensive experience building and maintaining ecommerce platforms, and focus on technical leadership spanning Azure architecture, Terraform IaC, GitHub Actions CI/CD, technical decision-making, planning, estimation, code reviews and engineering standards.

---

### CORE TECHNICAL SKILLS

**PHP & Backend:** PHP 8.4, PHP 8.3, PHP 7.4 • Symfony 7.x, 6.4, 4.4 • REST APIs • API versioning • API documentation • OAuth2

**Architecture:** Software architecture • scalable backend systems • MVC • SOLID • clean code • design patterns • technical decision-making

**Database & Performance:** MySQL • slow-query monitoring • indexing • schema design • usage-driven table design • performance optimization

**Caching & Security:** Redis • Symfony Cache • Varnish • OAuth2 tokens • form authentication

**Testing & Quality:** PHPUnit • Selenium • regression testing • automated testing • code reviews • QA collaboration

**Cloud & IaC:** Azure • AWS • Terraform (IaC) • Container Apps • Azure Functions • MySQL Flexible Server • queues • Key Vault • Container Registry • monitoring tools

**CI/CD & Containers:** GitHub Actions • GitLab • Jenkins • Docker • automated deployments • containerized environments

**Tools & Frontend:** Git • Composer • Linux/CLI & MAC • Jira • Confluence • JavaScript • React • Twig • Sass • LESS

### PROFESSIONAL EXPERIENCE

#### Tech Lead SW Digital Experience — Vorwerk

01/2026 – Present | Madrid

- Lead hands-on software engineering and solution architecture for Thermomix and Kobold ecommerce platforms, combining backend development with technical leadership and architectural decision-making.
- Lead the migration of a complete project architecture from AWS to Azure, designing the target infrastructure with Terraform and Infrastructure as Code (IaC).
- Design and implement Azure infrastructure using Container Apps, Azure Functions, MySQL Flexible Server, queues, Key Vault, Container Registry and monitoring workbooks.
- Build GitHub Actions CI/CD pipelines from scratch, establishing automated deployment workflows and strengthening DevOps practices.
- Design and maintain REST APIs with versioning and API documentation, supporting structured integration and compatibility across consumers.
- Optimize application and database performance through slow-query monitoring, index analysis, schema optimization and usage-driven table design.
- Implement caching strategies using Redis, Symfony Cache and Varnish to support application performance and scalability.
- Lead technical planning and estimation, act as the technical point of contact for project decisions, and establish development standards through code reviews and technical guidance.
- Resolve critical production incidents and contribute to deployments, monitoring, automation and continuous improvement of the ecommerce platform.

#### Senior PHP Developer — Vorwerk

11/2021 – 03/2026 | Madrid

- Develop and maintain PHP/Symfony ecommerce applications in a multilingual and multicountry environment serving end users and advisor partners.
- Develop backend solutions with PHP 8.3 and Symfony, contributing to modernization and migration toward current language and framework versions.
- Design, implement and maintain REST APIs with API versioning and comprehensive API documentation.
- Build automated test coverage with PHPUnit and Selenium, supporting regression prevention and reliable software delivery.
- Work with Docker and Git-based development workflows across development, QA and deployment environments.
- Analyze and optimize MySQL performance by monitoring slow queries, reviewing indexes and adapting database structures to usage patterns.
- Redesigned frontend with REACT, ajax and Junit testing.
- Implement secure authentication mechanisms including OAuth2 tokens and form-based authentication.
- Collaborate with cross-functional teams on requirements, delivery, QA acceptance and technical solutions across the ecommerce platform.

#### Senior Web Developer — ¡HOLA!

10/2019 – 11/2021 | Madrid

- Developed and maintained web applications using PHP 7.4, Symfony 4.4, Docker, PHPUnit, JavaScript and jQuery.
- Maintained and evolved Symfony-based applications across multiple projects and country-specific requirements.
- Developed automated tests with PHPUnit and supported deployment workflows through Jenkins and GitLab.
- Worked across backend and frontend components, applying clean-code and maintainability practices to existing codebases.

#### Senior Full Stack Developer — InterMundial

05/2019 – 10/2019 | Madrid

- Combined project coordination with hands-on software development for a travel-insurance business, translating business requirements into technical solutions.
- Planned projects, analyzed technical impact, organized development activities and coordinated delivery with the IT team.
- Developed applications using Symfony, Twig and Sass with Git and Bitbucket in a Linux environment.
- Promoted clean code, development best practices and improved engineering processes across the team.

## EARLIER TECHNICAL EXPERIENCE

**BrandValue— Web & Frontend Developer** | 05/2016 – 05/2019 — Developed and maintained PHP/JavaScript web applications in MVC/Joomla environments, working with MySQL, AJAX, ECMA Script 6, Node.js and Gulp; contributed across frontend, backend, application logic and databases within Scrum teams.

**Pleiades Tecnología — Consultant & Web Manager** | 08/2014 – 05/2016 — Designed and maintained websites and web portals while providing technical support, user helpdesk services, software/OS deployment, technical training, VMware administration, documentation and infrastructure/server consulting for HPE partners.

**Libertia S.L. — System Department Scholarship** | 04/2014 – 06/2014 — Provided enterprise IT support, including Windows Server 2012, WDS migration activities and technical support for Banco Pichincha.

**Plan International — Computing Systems Volunteer** | 12/2013 – 03/2014 — Implemented a PHP-based open-source ticketing system and supported Active Directory, DNS and SMTP services.

**ISBAN — Bank Software Consulting Scholarship** | 03/2013 – 10/2013 — Supported IT projects from requirements through production, including debugging of a currency-exchange web application.

## EDUCATION & LANGUAGES

**Técnico en Administración de Sistemas Informáticos en Red** — IES Virgen de la Paloma / IES Clara del Rey | 2012–2014

**Licenciado en Ciencias Ambientales** — Universidad Autónoma de Madrid | 2006–2010

Languages: **Spanish** — Professional • **English** — Professional • **French** — Basic

## CERTIFICATIONS & COURSES

**The Complete Microservices & Event-Driven Architecture** — Udemy • 09/2026

**Upgrading & What's New in Symfony 7** — SymfonyCasts • 08/2026

**Software Development Ecosystems & Management 3.0** — Aúna Formación y Coaching • 04/2026

**Use Case Requirements Course** — EscuelaIT • 03/2026

**Symphony Foundation Certification** — BCS • 07/2025

**Agile and Heavyweight Software Architectures** — EscuelaIT • 01/2024

**Design Patterns for Fun and Proficiency** — SymfonyCasts • 01/2024

**Laravel 2019: The Complete Guide with Real-World Projects** — Udemy • 10/2023

**Modern Software Architecture: DDD, Events & Microservices** — Udemy • 04/2023

**Advance course in Unit testing** — EscuelaIT • 05/2022

**Leadership and Team management** — TP Oficina Técnica de Prevención • 11/2021
